

Workflow description based on a bug

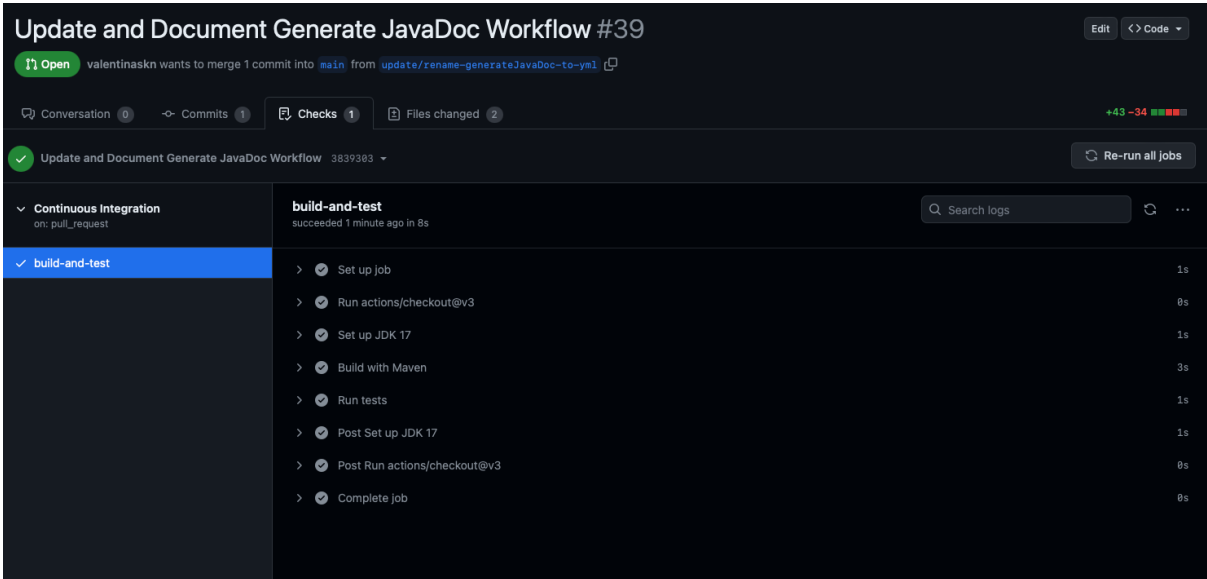

Bug was identified during review/testing meeting and reported via issue & is stage “In Review” because merge request (picture 2) was already generated

Detailed description of changes were provided:

When merge was requested it triggered continuous integration workflow – checks passed

Screenshot of **Continuous Deployment logs** after merge request (all workflows have been triggered and performed correctly)

These screenshots collectively serve to document the development workflow, from code integration to automated testing and deployment, as well as task management through the Kanban board:

- Backlog: Tasks planned but not yet started.
- Ready for implementation: Tasks prioritized and prepped for work.
- In Progress: Tasks currently being worked on.
- In Review: Tasks completed and awaiting quality check or approval.
- Done: Tasks fully completed and approved.
